SUMMARY

Software Engineer with 3+ years of experience building scalable web applications and distributed systems. Skilled in full-stack development, cloud platforms, and modern software architecture. Passionate about solving complex problems and delivering impactful products.

TECHNICAL SKILLS

Languages: JavaScript (Node.js), Python, Java, SQL

Design & DevOps: Microservices, Event-driven Architecture, Terraform, AWS, Docker, Linux, Nginx

Developer Tools: Git, GitHub Actions, RESTful APIs, CI/CD

Frameworks & Libraries: Spring Boot, React, Node.js, Kafka

EXPERIENCE

Software Development Engineer

Jan 2023 – Present

Neoscript.in

Bengaluru, IN

- **Infrastructure Automation:** Developed comprehensive Terraform scripts for streamlined deployment of Nginx, applications, and databases, enabling one-click environment management and reducing setup time by 80%.
- **System Architecture:** Implemented hybrid serverless/server architecture using AWS Lambda and Step Functions, reducing infrastructure costs by 70% while maintaining high availability.
- **Development Pipeline:** Established robust CI/CD pipelines with GitHub Actions, incorporating automated testing and security scans, improving deployment reliability by 45%.
- **Data Systems:** Architected event-driven data flow using Confluent Kafka and AWS services, ensuring data consistency across multiple databases and microservices.

Associate Software Engineer-1

July 2021 – November 2022

HighRadius Technologies Pvt Ltd

Bhubaneswar, IN

- **Platform Development:** Contributed to B2B Credit Management System development, implementing ML-based credit risk prediction features and RESTful APIs.
- **Developer Tools:** Built and maintained developer tools and integration libraries, improving team productivity by 40%.

PROJECTS

MapMyMoments - AI Travel Planning Platform ([Link](#)) | *React, Go, MongoDB, AWS, AI* Feb 2025 – Present

Problem Statement: Built an intelligent travel planning platform enabling collaborative route creation with AI-powered photo organization and real-time sharing capabilities.

- Developed full-stack PWA with React + TypeScript frontend and Go backend, supporting 1,000+ concurrent users with 99.9% uptime and cross-platform compatibility.
- Integrated Claude AI assistant via Python MCP server for natural language trip planning, automatic photo fetching from Google Places API, and GPS-based waypoint extraction from user photos.
- Implemented AWS S3 storage system with CloudFront CDN for scalable photo management, handling 10GB+ daily uploads using presigned URLs and multipart batch processing.
- Built collaborative sharing features with JWT authentication, Google OAuth, and real-time multi-user route editing.
- Architected microservices-based system following clean architecture principles with dependency injection, implementing separate layers for HTTP handlers, business logic, and data storage with MongoDB and AWS SQS integration.

EDUCATION

GIET University

Bachelor of Technology in Electrical and Electronics

Gunupur, IN

July. 2018 – May 2022

CERTIFICATES

AWS Certified Developer - Associate ([Link](#)) | *Cloud Development, AWS Services*

Dec 2023
